

ATLAS TECHNOLOGIES PVT. LTD.

CASE STUDY FOR 20-30 TPH
ASPHALT DRUM MIX PLANT
IN MALDIVES.

CLIENT REQUIREMENT

Customer's requirement was for a small and portable machine which was easy and hassle free to transport.

SOLUTION OFFERED

Understanding the customer's requirement for this 20-30 tph drum mixer export to Maldives was important for us.

We offered them our MDM 25 model which is rated at 20-30 tph.

It is offered with 2 x 2 aggregate bins and a compact chassis structure.

The entire plant was transported into 2 x 40 ft. + 1 x 20 ft. containers meaning less transportation costs.

INSTALLATION & COMMISSIONING

The offered plant is complete in all aspects including feeder bins, drum unit, 12 tons bitumen tank, wet dust collector, fuel storage tank. Control panel offered is PLC type with SCADA for remote trouble shooting facility.

We sent a technician for hassle free installation of the machine. Installation and trial run of the machine was offered to the outmost satisfaction of the customer
